Lifelong
Learning
Programme

1. INTRODUCTION

The Memorandum of Understanding (MoU) is a voluntary partnership agreement in which conditions for a mutual recognition of training provided and/or validated informally acquired skills are concluded between partners from different countries. The MoU sets the framework for recognition of Learning Outcomes (LO) and establishes the partnership's procedures for cooperation..

Partners using this agreement, on the basis of mutual trust, accept each other's quality assurance, assessment, validation and recognition criteria and procedures as satisfactory for the purpose of transferring credits within a mobility period. They agree on the general conditions such as objectives and duration and recognize other actors and further institutions that may be involved.

2. GENERAL OBJECTIVES OF THE MOU

The objective of this Memorandum of understanding is to create a framework allowing people interested in a geographic or professional mobility to have their training credits –acquired in one or more Countries/Regions part of the MoU- recognized by the subscriber organizations.

3. PERIOD OF ELIGIBILITY OF THE MOU

This MoU will be valid for a period of 12 months from the signing date and it will be renewed by tacit agreement. Each subscriber partner can terminate the agreement informing other partners through registered mail with at least a 30 days' notice.

4. INFORMATION ABOUT THE PARTNERS

The protocol involves the organizations mentioned in Attachment 4

5. INFORMATION ABOUT THE TRAINING PROGRAMM(ES) OR QUALIFICATION(S) CONCERNED

The MoU deals with the following training programmes / qualifications

1.

NAME IN ORIGINAL LANGUAGE	Operatore Socio Sanitario (IT)
NAME IN ENGLISH	Health and social care worker

2.

NAME IN ORIGINAL LANGUAGE	Infirmiera (RO)
NAME IN ENGLISH	Health Care Assistant

3.

NAME IN ORIGINAL LANGUAGE	OPIEKUN W DOMU POMOCY SPOLECZNEJ (PL)
NAME IN ENGLISH	Care Assistant in Social Welfare House

Attachment 1:

- Description of each profile

6. GENERAL AGREEMENT ON THE LEARNING OUTCOMES THAT CAN BE OBJECT OF TRANSFER AND MUTUAL VALIDATION

The following learning outcomes can, in principle, be considered for transfer and mutual validation:

PERSONAL HYGENE	He/she is able to assist the person in personal hygiene
NUTRITION AND FEEDING	He/she is able to assist the person in nutrition and feeding
MOBILIZATION	He/she is able to support the user in the mobility according to the different degree of disability, adopting the most suitable measures, if dependent or bed-bound repositions, walking inside (at home or in a care facility) and outside, transportation
MANAGEMENT AND HYGENE OF LIVING ENVIRONMENTS	He/she is able to take care of cleaning and hygiene of the care recipient's living environment, bed hygiene, respecting the sanitary and safety rules, with a particular focus on care recipient's living environment. He/she is able to support the patient to carry out the most common bureaucratic procedures.
FIRST AID	He/she is able to provide older people with emergency care/ first aid.
COMMUNICATION	He/ she is able to communicate with the care recipient and his/her family using, (if migrant) the language of the working place, using, if necessary, alternative methods of communication
PROFESSIONAL ETHIC	He/ she observes the principles of professional ethics

Attachment 2:

- Indicators and ECVET points

7. RESPONSIBILITIES

Should a participant to one of the training programmes mentioned in point (5) be interested in transferring its credits to obtain any of the other qualifications mentioned in point (5) issued by any of the partners

mentioned in point (4), he/she should inform his/her **sending organization** that will provide the competence certificate / assessment of LO developed according to IQEA Template (attached). The **receiving organization** will recognize the LO and acknowledge the related ECVET points.

8. QUALITY ASSURANCE

Each partner organization assures the following quality standards:

- The content of the training provided and/ or of the carried out validation path of the informally acquired skills allows the trainee to obtain the learning outcomes indicated at point (6) according to the indicators described in attachment 2 to this document.
- The trainee has been assessed using at the least the assessment tools agreed in the IQEA project (attachment 3). The partner organization assures that the trainee has done the tests autonomously and without any help.
- Each sending organization is also committed to assess the quality of the training provided according to EQARF indicators and / or CEDEFOP's guidelines for validation of non-formal and informal learning and to provide the assessment to the receiving organization.

9. ASSESSMENT

The trainees will be assessed on the Los indicated at point (6) using at the least the assessment tools developed within the IQEA project. Partner organizations are free to use any other additional assessment method, including for example oral exams, practical exams etc., according to local regulations and usual methodologies.

10. VALIDATION AND RECOGNITION

The receiving organization, upon request of the trainee, will acquire the competence certificate issued by the sending organization, validate the already acquired skills and acknowledge the respective ECVET points, as indicated in Attachment 2. The receiving organization will finally provide the trainee with:

- an indication of the missing learning outcomes he/she should acquire in the receiving region / country in order to obtain a full equivalence of his/her qualification;
- information about how the full qualification can be obtained.

[ATTACHMENTS]

ATTACHMENT 1 – JOB AND TRAINING DESCRIPTIONS

HEALTH AND SOCIAL CARE WORKER (OSS) - ITALY

1. Job description

OSSs carry out activities to a) meet the basic needs of the person, within their areas of competence, in a social and health care context; b) promote the welfare and autonomy of the patients.

OSSs have competences both in the social and sanitary sector and addressed to the people and their living environment: a) direct assistance and residential help b) sanitary and social intervention c) management support, organizational and training.

2. General term of job practicing

OSSs work in close collaboration with other health and sanitary personnel according to a “multi-professional approach”. OSSs receive specific tasks and duties from other higher sanitary professional profiles (e.g. nurses but also Radiology technicians, Biomedical laboratory technicians and physiotherapists) as well from other higher social professional profiles (Social worker).

3. Education and experience

To access to OSS training courses, participants are required to have the compulsory school certification and to be over 17 years old. Training course is based on 2 modules a) a basic module b) a specific, vocational training module. Training courses are annual for a number of hours not less than 1000

4. Specific activities carried out

Direct care and domestic feeding support

- Assists the person, especially if dependent or bed-bound, in everyday activities and personal hygiene
- Carries out basic therapeutic activities and basic diagnostic support
- Cooperates to activities aimed to maintain remaining psycho - physical capacities, re-education, re-activation and functional recovery
- Performs recreational activities and socialization activities for individuals and groups

- Supports social and health care professionals in assisting ill persons, even if terminally ill and dying persons.
- Takes care of cleaning and hygiene of the patient 's living environment
- Supports the care recipient in managing his/her living environment
- Takes care the cleaning and the environment hygiene

Hygiene, health and social intervention

- Monitors and assists to the gathering of data about the needs and risky conditions of the care recipient
- Cooperates to the put in practice of health care services
- Evaluates, according to its competences, the most suitable interventions that should be put in practice
- Cooperates to the evaluation of the quality of provided services
- Knows and uses parlances and means of communication / relation which are appropriate according to the working conditions
- Puts in practice helping relationships with the care recipient and his/her family, in order to support social integration and to maintain /recover personal identity
- Supports in the organizational, training and management activities
- Supports the put in practice of interventions evaluation protocols
- Cooperates to the assessment of the services quality
- Uses common informative tools to record what registered during the working shift
- Cooperates to the definition of his/her own training needs and attends training / refresher courses
- Cooperates to realization and evaluation of internships of OSS students
- Supports in simple activities within care services

5. Work place

OSSs are allowed to work inside hospitals as well outside (primary nursing) both for residential and non-residential activities in the following areas: social sector, health services, social-welfare and socio-health, semi-residential in hospital and at patients' home.

6. Work context

OSSs normally work on shifts (day / night and holidays). Cooperate with other persons such as social workers, psychologists, nurses, doctors and family members and carers of the patient. They are normally employed by public or private organizations.

HEALTH CARE ASSISTANT - ROMANIA

1. Job description:

The persons qualified in this occupation execute care activities and contribute in maintaining an optimal environment for the patient's physical and psychological status in hospitals or in social and socio-medical institutions.

They ensure the hygiene and the adequate life environment for the assisted person, accompanying the patients in accomplishing daily activities.

They also ensure the hydration and the adequate feeding process of the beneficiaries.

The health care assistants stimulate the beneficiaries to take part to daily activities and they contribute to the improvement of health and regain of autonomy. They also help in the medication administration for the assisted persons.

They are responsible for the transportation and accompaniment of the beneficiaries, respecting the rights and the confidentiality regarding the evolution of the beneficiary's health status.

2. General terms of job practicing:

The environment where the activities requested by this job are delivered consists of hospitals and other institutions in the medical, socio-medical or social field (e.g.: long term care centres for elderly), so it is usually a protected space. The work is usually scheduled in a strict way, in shifts. This can include nights and/or week-end work. Activities are usually unstructured. This job requires frequent interpersonal interactions with medical staff (doctors, nurses), with patients and their relatives. It involves also handling persons and different equipment. There could be risks of exposure to viruses and radiations. Sometimes conflict situations may occur.

3. Education and experiences:

This job requires a basic education level – 8 classes. In order to hold this profile, specialization training is needed. The training is based on a curriculum that contains a variable number of hours (about 150),

including theory and practice. The curriculum contains the following modules: planning the care activities; continuous training; working within a multidisciplinary team; interactive communication; respecting the rights of the assisted person; supervising the health status of the assisted person; feeding and hydrating the assisted person; the hygiene of the space where the assisted person lives; the personal hygiene of the assisted person; transporting the clothes; transporting the assisted persons.

5. Specific activities carried out:

Specific operational activities:

- Changing bedclothes and personal clothes (to ensure the adequate hygiene for every beneficiary)
- Repositioning and turning around the persons immobilized in bed (to prevent the discomfort and the pains due to a long time used position)
- Preparing, serving and collecting the food trays
- Feeding the dependent beneficiaries
- Ensuring the care of the persons by furnishing and emptying the bedpans
- Dressing up the assisted persons
- Supervision of routine exercises
- Preparing the persons for medical examination or treatments
- Cleaning in the rooms, and other interior spaces in the institution
- Monitoring the quantities of water and food taken and eliminated by medical staff requests
- Reporting to the medical staff the problems observed at the beneficiaries
- Delivering treatments such as massage, showers, suppositories, by request and under supervision of a nurse or doctor
- Realizing inventory charts for the delivery of necessary materials
- Depositing, preparing, sterilizing and distributing necessary instruments for treatments and rooms or surgical rooms (dressing packages, bandages, coats, cotton-wool packages, disinfectants etc.)

6. Work place:

The activities take place in hospitals and in other institutions in the medical, socio-medical or social field (e.g.: residential centres for elderly).

7. Work context:

The health care assistant works in collaboration and under the responsibility/supervision of a nurse. Usually, they work within a multidisciplinary team (doctor, nurse, psychologist, social worker) and participate in the preventive, curative or palliative health care. They work in private or public contexts.
